Seattle, WA | 425-289-8526 | js.wood206@gmail.com | Github | Blog | LinkedIn

SOFTWARE ENGINEER

Fullstack web developer with a passion for problem solving. Developed troubleshooting and diagnosing skills through a decade of experience as a motorcycle technician before transitioning to code. Strong communication skills and ability to explain complex issues to both team members and customers. Responsible for completing immense projects efficiently and professionally.

TECHNICAL SKILLS

JavaScript, React, Redux, NodeJS, Ruby, Ruby on Rails, OOP, HTML, CSS, SQL, REST, Git

TECHNICAL PROJECTS

Pic-Sure - Github | Demo

Image-sharing-single-page application with likes and comments.
- Built with React/Redux frontend and a Ruby on Rails API backend
- Manages asynchronous dispatch requests with Thunk
- Utilizes JSON Web Tokens and hashing for user login authentication.
- Implements active storage for handling image data.
- Applies standard action/reducer Redux file structure and implements a root reducer for separation of concerns

Flavor Town - Github | Demo

Restaurant listing site for documenting must-try restaurants and dishes
- Built with a Ruby on Rails backend, with vanilla JavaScript for the frontend
- Constructed with object oriented JavaScript classes (OOJS)
- Employs AJAX requests and serialized JSON responses from a REST API
- Utilizes CRUD functionality and RESTful routing conventions
- Incorporates resource filtering by city and style

Coffee Talk - Github | Demo

Coffee review site
- Full MVC (Model, View, Controller) style app in Ruby on Rails
- Incorporates user signup and login with Oauth, as well as traditional username and password.
- Utilizes CRUD functionality and RESTful routing conventions
- Implements nested routing and resource instantiation

EXPERIENCE

Everett Powersports   Everett, WA
Technician   08/2015 - Present
- Proficient in mechanical, electrical, chassis, and fuel systems.
